StormAudio Set to Unleash its 16-Channel Integrated Immersive Audio AV Processor at ISE 2017

The newest addition to StormAudio's line of immersive audio components, the I.ISP 3D.16.12 is the company's first combination integrated amplifier / AV processor. With its rich performance, advanced feature sets and unique management conveniences, the I.ISP 3D.16.12 is already setting the standard for what the heart of today's immersive home cinema should be.

The I.ISP 3D.16.12 has built-in compatibility with all existing and future sound formats including Auro-3D®, Dolby Atmos®, DTS:X™ as well as UHD 4K video.

Mol, BELGIUM – January 17, 2017 – High-performance brand StormAudio will unveil its Super AVR to the European market at ISE 2017 (stand 1-N122). The I.ISP 3D.16.12 is a 16-channel integrated amplifier / immersive audio AV processor compatible with Auro-3D®, Dolby Atmos®, DTS:X™ and UHD 4K video. The unit outputs 12-channels at an astonishing 200 watts each and is expandable to 16-channels by way of optional external amplifiers or powered subwoofers. The I.ISP 3D.16.12 is the latest addition to the brand's line of immersive audio processors and amps. Delivery is scheduled for February 2017. MSRP is set at €13.990,00.

The I.ISP 3D.16.12 incorporates much of the technological advancements and feature sets found in the company's marquee ISP 3D.32 ELITE | Reference Edition processor which received a 2017 CES Innovations Award. Built into the I.ISP 3D.16.12 integrated amp/processor is StormAudio's proprietary immersive audio processing (ISP), StormOptimizer room calibration and StormRemote web-based monitoring tools.

The I.ISP 3D.16.12 delivers fully-configurable speaker management and is aptly suited to drive configurations from 5.1 to 13.1. Its scalable modular platform approach and incorporated 4-balanced XLR outputs also make connection to an external amplifiers or powered subwoofers easy (and raises total output to 16-channels).

The I.ISP 3D.16.12 is equipped with 8-HDMI inputs and 2-outputs with UHD 4K and HDCP2.2 and HDMI2.0 support. For private headphone listening, incorporated is SpherAudio, a binaural technology that delivers a immersive sound experience from native or virtualized sources.

"StormAudio's mission is to provide unprecedented sound and service for both the dealer and end-user," says StormAudio Senior Vice President Yves Trélohan. "Our new I.ISP 3D.16.12 is no exception. It is the perfect solution for today's home cinemas where use of separate preamp/processors and amps are not ideal due to either budget or space limitations. From its advanced feature sets and performance,

to luxurious fit-and-finish, the I.ISP 3D.16.12 is a new breed of Integrated Immersive Sound AV Processor that is already setting the standard for what the heart of the immersive home cinema should be.”

The I.ISP 3D.16.12 is StormAudio’s first combination preamp/processor/amplifier. It joins a line of immersive audio preamp/processors (which also have built-in compatibility with Auro-3D®, Dolby Atmos®, DTS:X™) that range from 16- to 32-channels and amplifiers that range from 8- to 16-channels. All are designed and manufactured in France under the guidance of StormAudio Senior Vice President Yves Trélohan, head of the Home Entertainment and Luxury Audio Product Division, owned by Auro Technologies.

Earlier this month StormAudio unveiled the I.ISP 3D.16.12 in America at the 2017 CES, where it was hailed a Best of CES by AVSForum.com.
